Subject: "Uppskot til løgtingslóg um broyting í løgtingslóg um dagstovnar og dagrøkt" - the lack of involvement of NÁD
Importance: High

Dear Eva

As per my telephone call to you earlier, I wish to draw your attention to the following:

1. It is deeply regrettable that staff from NÁD were not involved in the very crucial process of the proposed changes to the " *løgtingslóg um dagstovnar og dagrøkt*". The existing law clearly states that the *dagstovnaráðið* must include NÁD in **§ 2** *Stk. 3.3: "*... Námsvísindadeildin á Fróðskaparsetri Føroya velur tvey umboð við námsfrøðiligari útbúgving og royndum innan dagstovnaøkið". From what I gathered from my conversation with you, the *dagstovnaráðið* has not been functioning, and therefore, the proposed changes to the law have been made by BÚMR & kommunufelagið. While I fully accept the Minister's authority to decide whether or not to involve the *dagstovnaráðið* in the process, bypassing this expert body appears counterproductive. Leveraging specialised knowledge would only strengthen the decision-making process. With due respect, it is ultimately the Ministry's responsibility to ensure that such appointed advisory bodies are utilised effectively and fulfill their intended purpose.
2. I respectfully urge the Ministry to establish and activate *dagstovnaráðið* as soon as possible and to allow our staff, as qualified experts in the field, to contribute to this vital area as it is crucial for the wellbeing of children and the future of Faroese society.

Best regards

Kalpana
